1. Introduction

The XC111 Connector Board is part of the Acconeer XC111-XR111 Evaluation Kit. XC111 has space for up to 4 XR111 Radar Sensor Boards. Its purpose is to enable a wide variety of use cases. The board has been designed for use with a Raspberry Pi3.

2. XC111 Connector Board

1.1 Overview

Picture 1 shows the XC111 Connector Board, front side, including 1 XR111 Radar Sensor Board and with a Raspberry Pi connected.

Picture 2 shows the reverse side of the XC111.

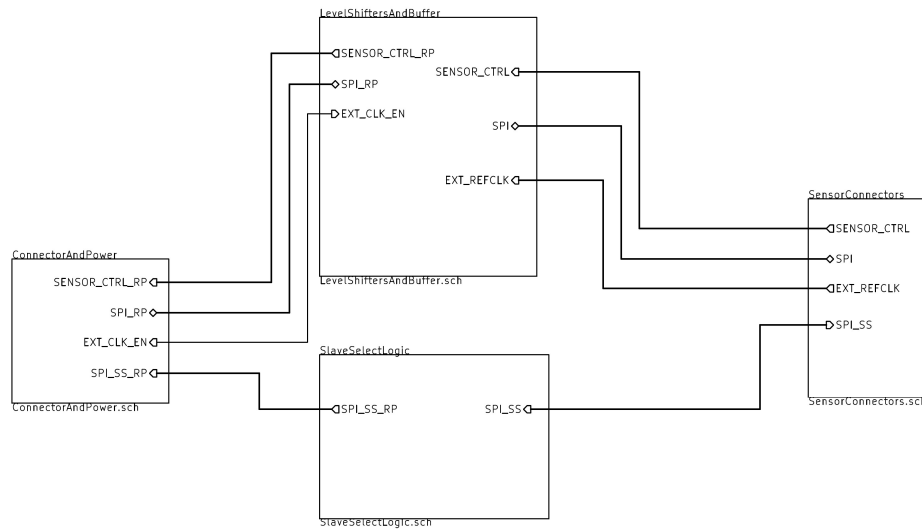

1.2 Power

The XC111 Connector Board is powered through the Raspberry Pi. When the power LED on the Raspberry Pi is lit, the board is powered on and ready for use.

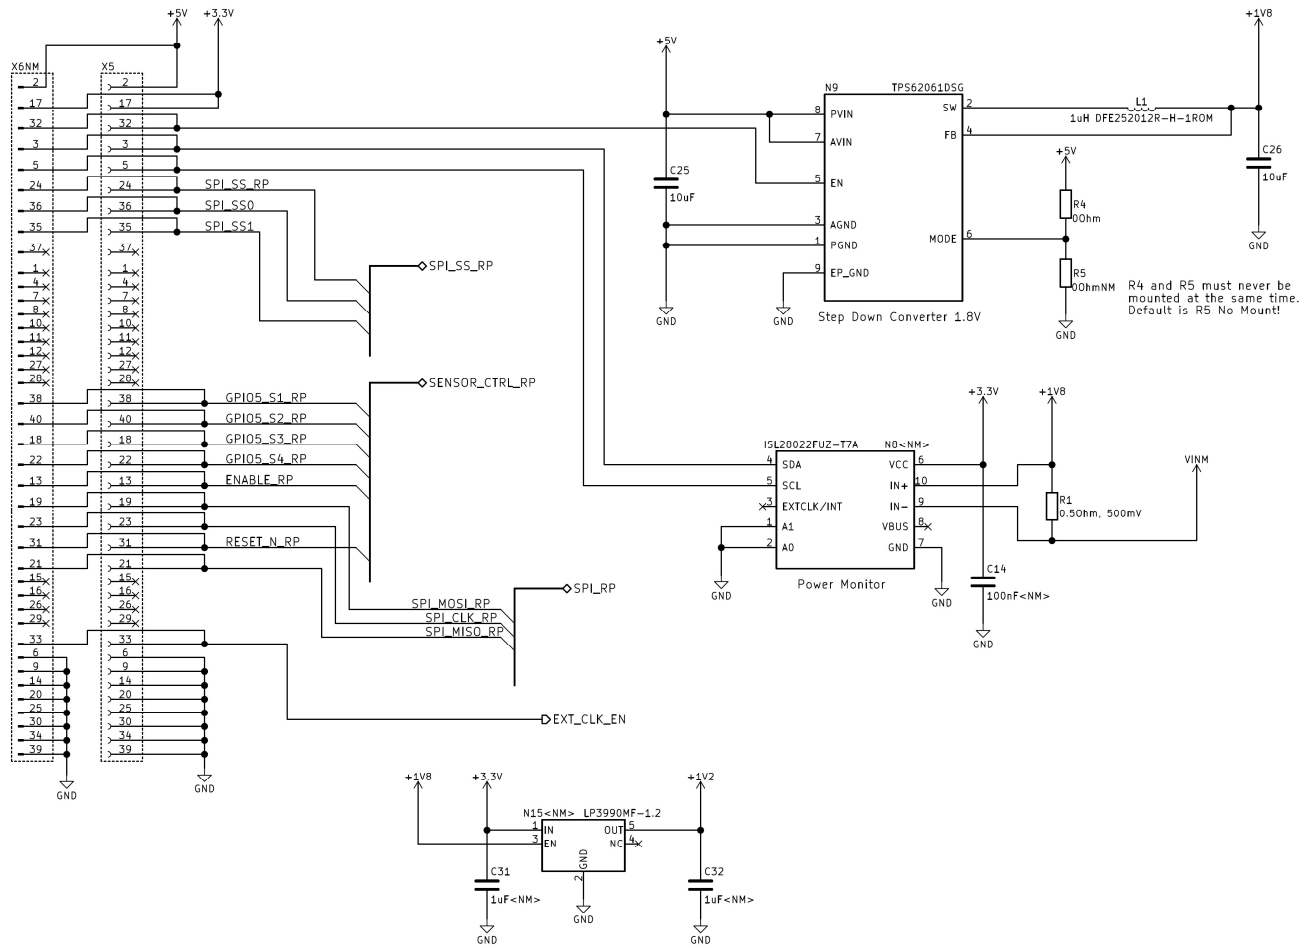

1.3 Electrical Schematics

On the following pages, please find the electrical schematics for the XC111.

1.4 Bill of Materials
