Description

Pericom Semiconductor's PI49FCT3805D is composed of non-inverting drivers. The outputs are configured into 2 groups of one-in, five-out with independent output enable. Group B has an extra MON output. Excellent output signals to power and ground ratio minimize power and ground noise and also improves output performance.

Storage Temperature	-65°C to +150°C
Ambient Temperature with Power Applied	-40°C to +85°C
Input Voltage to GND Potential (Inputs & V _{CC} Only)	-0.5V to 5.5V
Output Voltage to GND Potential (Outputs & I/O Only)...	-0.5V to +V _{CC} +0.5V
V _{CC} Input Voltage.....	-0.5V to +4.6V

Note:

Stresses greater than those listed under MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.
