

## Fan Motor Module

The fan motor controller board allows speed and direction control of a low power DC motor. 100% Arduino Compatible.

- Operating voltage output: 3V – 6V MAX
- Speed (no load): 15000 rpm
- Speed (6V): 8000 rpm
- Current (6V): 40mA
- Stall current (6V): 360mA
- Torque (6V): 0.111kg/cm

### Product Info

Stock Code	FAN-01
Description	Fan Motor Module
Package Size	1
