DIMM™ - The Robot who can teach kids to code.

BIB001

These amazing new robot maker kits provide the perfect project to get started coding with the micro:bit.

In his space lab on planet Hex, alien inventor Binary has been busy creating exciting programmable objects that will help young inventors learn coding and about the Internet of Things and STEM.

Inside the box you, will find everything you need to build Binary's invention DIMM and then make DIMM do loads of cool stuff with computer code.

What's in the box:

- Flat-pack cardboard Dimm™
- Project sticker sheets
- Crocodile clip hands
- Temperature, motion, and light sensors
- Speaker
- Instruction booklet
- micro:bit **not included!**

Warning: only for use by children aged 8 years and older. Instructions for parents are included and must be observed.
