

WIRELESS WATER LEAK SENSOR

The wireless water leak sensor uses a water probe to detect the presence of water or other liquids. When the presence of water or another liquid is detected, an alert is sent over the wireless network.

Indoor / Smart Building

Outdoor / Industrial

APPLICATIONS

- Detect basement flooding
- Sump pump failure
- Leaking toilets
- Broken or leaking plumbing
- Frozen water pipe detection
- Fuel leakage
- General water or liquid sensing

FEATURES

- Built-in radio that talks directly with the LoRaWAN wireless network
- Two types of tamper detection: enclosure tamper and wall mount tamper
 - Enclosure tamper
 - Wall mount tamper detects (indoor version)
- 200,000+ transmissions on a single battery and a 5-10 year battery life depending on usage
- User replaceable battery
- Fully integrated internal antenna
- Over the air sensor configuration in the field
- Automatic low battery reporting and supervisory (sensor health) reporting
