

Grove Shield for Arduino Nano

SKU 103100124

As the name indicate this shield is made for Arduino Nano, but it also can be used with Seeduino Nano. This shield pulls out the pins of the motherboard and expands to 8 Grove connectors, including 3 Grove digital connectors, 3 Grove analog connectors, 1 Grove I2C connector, and 1 Grove UART connector.

With the help of the Grove system, you can connect hundreds of Grove sensors, Grove actuators and Grove displays to the Arduino Nano with a simple plug.

Note

This product does not include a Seeduino Nano, please click [here](#) if you need one.

Pinout

You can check the silkscreen at the back side of this shield.
