SN74ALVC162836 20-BIT UNIVERSAL BUS DRIVER WITH 3-STATE OUTPUTS

SCES129D-MARCH 1998-REVISED AUGUST 2004

FEATURES

- Member of the Texas Instruments Widebus™ Family
- Operates From 1.65 V to 3.6 V
- Max t_{pd} of 4 ns at 3.3 V
- ±12-mA Output Drive at 3.3 V
- Output Port Has Equivalent 26-Ω Series Resistors, So No External Resistors Are Required
- Designed to Comply With JEDEC 168-Pin and 200-Pin SDRAM Buffered DIMM Specification
- Latch-Up Performance Exceeds 250 mA Per JESD 17
- ESD Protection Exceeds JESD 22
 - 2000-V Human-Body Model (A114-A)
 - 200-V Machine Model (A115-A)
 - 1000-V Charged-Device Model (C101)

DESCRIPTION/ORDERING INFORMATION

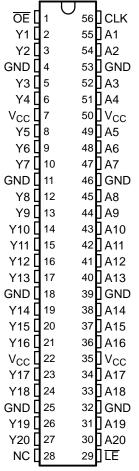

This 20-bit universal bus driver is designed for 1.65-V to 3.6-V V_{CC} operation.

Data flow from A to Y is controlled by the output-enable (\overline{OE}) input. The device operates in the transparent mode when the latch-enable (\overline{LE}) input is low. When \overline{LE} is high, the A data is latched if the clock (CLK) input is held at a high or low logic level. If \overline{LE} is high, the A data is stored in the latch/flip-flop on the low-to-high transition of CLK. When \overline{OE} is high, the outputs are in the high-impedance state.

The output port includes equivalent 26- Ω series resistors to reduce overshoot and undershoot.

To ensure the high-impedance state during power up or power down, $\overline{\text{OE}}$ should be tied to V_{CC} through a pullup resistor; the minimum value of the resistor is determined by the current-sinking capability of the driver.

DGG, DGV, OR DL PACKAGE (TOP VIEW)

NC - No internal connection

ORDERING INFORMATION

| T _A | PACKAGE ⁽¹⁾ | | ORDERABLE PART NUMBER | TOP-SIDE MARKING |
|----------------|------------------------|---------------|-----------------------|------------------|
| | SSOP - DL | Tube | SN74ALVC162836DL | ALVC162836 |
| -40°C to 85°C | 330F - DL | Tape and reel | SN74ALVC162836DLR | ALVC102030 |
| -40 C to 65 C | TSSOP - DGG | Tape and reel | SN74ALVC162836DGGR | ALVC162836 |
| | TVSOP - DGV | Tape and reel | SN74ALVC162836DGVR | VC2836 |

(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Widebus is a trademark of Texas Instruments.

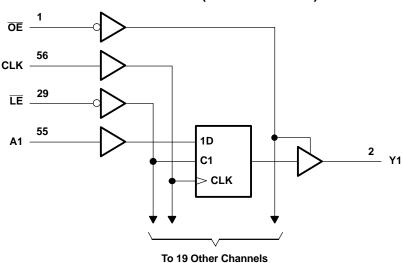

FUNCTION TABLE

| | INPUTS | | | | | | |

ABSOLUTE MAXIMUM RATINGS(1)

over operating free-air temperature range (unless otherwise noted)

| | | | | MIN | MAX | UNIT |
|------------------|--|--------------------|------|------|-----------------------|------|
| V _{CC} | Supply voltage range | | | -0.5 | 4.6 | V |
| V _I | Input voltage range ⁽²⁾ | | -0.5 | 4.6 | V | |
| Vo | Output voltage range ⁽²⁾⁽³⁾ | | | -0.5 | V _{CC} + 0.5 | V |
| I _{IK} | Input clamp current | V _I < 0 | | | -50 | mA |
| I _{OK} | Output clamp current | V _O < 0 | | | -50 | mA |
| Io | Continuous output current | | | | ±50 | mA |
| | Continuous current through each V _{CC} or G | GND | | | ±100 | mA |
| | | DGG package | | | 64 | |
| θ_{JA} | Package thermal impedance (4) | DGV package | | | 48 | °C/W |
| | | DL package | | | 56 | |
| T _{stg} | Storage temperature range | | | -65 | 150 | °C |

⁽¹⁾ Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

⁽²⁾ The input negative-voltage and output voltage ratings may be exceeded if the input and output current ratings are observed.

³⁾ This value is limited to 4.6 V maximum.

⁽⁴⁾ The package thermal impedance is calculated in accordance with JESD 51-7.

RECOMMENDED OPERATING CONDITIONS(1)

| | | | MIN | MAX | UNIT | |
|-----------------|------------------------------------|------------------------------------|----------------------|----------------------|------|--|
| V _{CC} | Supply voltage | | 1.65 | 3.6 | V | |
| | | V _{CC} = 1.65 V to 1.95 V | $0.65 \times V_{CC}$ | | | |
| V_{IH} | High-level input voltage | V _{CC} = 2.3 V to 2.7 V | 1.7 | | V | |
| | | V _{CC} = 2.7 V to 3.6 V | 2 | | | |
| | | V _{CC} = 1.65 V to 1.95 V | | $0.35 \times V_{CC}$ | | |
| V_{IL} | Low-level input voltage | V _{CC} = 2.3 V to 2.7 V | | 0.7 | V | |
| | | V _{CC} = 2.7 V to 3.6 V | | 0.8 | | |
| V _I | Input voltage | · | 0 | 3.6 | V | |
| Vo | Output voltage | | 0 | V _{CC} | V | |
| | | V _{CC} = 1.65 V | | -2 | | |
| | High lovel output ourrent | V _{CC} = 2.3 V | | -6 | mA | |
| I _{OH} | High-level output current | V _{CC} = 2.7 V | | -8 | | |
| | | V _{CC} = 3 V | | -12 | | |
| | | V _{CC} = 1.65 V | | 2 | | |
| | Low lovel output output | V _{CC} = 2.3 V | | 6 | ^ | |
| l _{OL} | Low-level output current | V _{CC} = 2.7 V | | 8 | mA | |
| | | V _{CC} = 3 V | | 12 | | |
| Δt/Δν | Input transition rise or fall rate | | | 10 | ns/V | |
| T _A | Operating free-air temperature | | -40 | 85 | °C | |

⁽¹⁾ All unused inputs of the device must be held at V_{CC} or GND to ensure proper device operation. Refer to the TI application report, Implications of Slow or Floating CMOS Inputs, literature number SCBA004.

NOTES: A. C_L includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low, except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high, except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR \leq 10 MHz, Z_{Ω} = 50 Ω .
- D. The outputs are measured one at a time, with one transition per measurement.
- E. t_{PLZ} and t_{PHZ} are the same as t_{dis}.
- F. t_{PZL} and t_{PZH} are the same as t_{en} .
- G. t_{PLH} and t_{PHL} are the same as t_{pd} .
- H. All parameters and waveforms are not applicable to all devices.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
