

F2812 eZdsp Starter Kit (DSK) with European Power Cords (DSP8292U)

Quantity in Basket: *none*
Code: **TMDSEZD2812-0E**

Shipping Weight: **3.81**
pounds
Availability: **Ships in 24**
to 48 hours

Overview

The TMX LF2812 eZdsp™ is a stand alone module that lets evaluators examine certain characteristics of the TMS320F2812 digital signal processor (DSP) to determine if this DSP meets their application requirements. This module has a single chip parallel port to JTAG scan controller. Therefore the module can be operated without additional development tools such as an emulator. Furthermore, the module is an excellent platform to develop, demonstrate, and run software for the TMS320F2812 processor.
