## Description

C2000™ Experimenters Kits from Texas Instruments are device evaluation kits, providing a platform for initial device exploration and prototyping. Each Experimenters Kit includes a docking station and a plug-in compatible controlCARD, which docks directly onto the docking station. The docking station features on-board USB JTAG emulation, access to all C2000 MCU signals from the controlCARD, breadboard areas for experimentation, and JTAG and RS-232 connectors. For software development, Code Composer Studio (CCS) Integrated Development Environment (IDE) is included for free with use of the on-board XDS100 USB JTAG emulator. Device software, support, example projects, libraries, and documentation are provided completely free through C2000's controlSUITE™ software platform. Learn more and download controlSUITE today by clicking the Software tab on the C2000 home page at [www.ti.com/c2000](http://www.ti.com/c2000).

## Features

- Piccolo TMDXCNC28055ISO controlCARD with TMX320F28055 MCU
- Isolated USB JTAG Interface
- Access to all C2000 MCU signals from the controlCARD
- Breadboard area for experimentation
- JTAG, RS-232 connector
- s
- USB powered

## What's Included

- Piccolo TMDXCNC28055ISO Isolated controlCARD
- Docking Station
- USB Cable
- Code Composer Studio (CCS) Integrated Development Environment (IDE)
- Software, support, example projects, libraries, and documentation available through the controlSUITE software platform
