

Ohm METRICS™ Test Equipment

CAL1000 Tester Calibration Device

The CAL1000 device is designed to facilitate easy, in-house, calibration verification of most ESD testers and surface resistance meters. The CAL1000 is designed to verify that testers calibrated to ANSI/ESD S1.1-1998 and ANSI/ESD STM9.1-2001 so it works with most makes of test equipment. With the rotation of the selector switch you can check that the testers are calibrated.
