

### ComfortTREAD FM9 Diamond-Plate Anti-Fatigue ESD Mats

**Quickly snap together an anti-fatigue ESD floor runner that can handle heavy traffic that can be installed by anyone.**

ComfortTREAD diamond-plate ESD anti-fatigue mats keep your workers comfortable and your ESD sensitive equipment safe. The 100%conductive rubber mats are embossed with raised diamond-plate treads for superior traction and feature wide beveled borders to promote safety. A fully molded honey-combed cell design absorbs shock and cushions the feet from constant contact with hard surfaces. As a result of this design, the mat will not separate, bubble-up, ripple, tear, compress or lose resiliency.

Available in interlocking 28"x30" sections that can build a 28"x5' standalone mat or long runners in 30" increments. The mats can be quickly dismantled to make moving and cleaning easy.

Meets or exceeds requirements of ANSI/ESD S20.20 per ANSI/ESD STM7.1.

### Features

- Anti-Fatigue Mat for ESD Areas
- 100% nitrile rubber: 10<sup>3</sup>-10<sup>5</sup>
- Diamond-plate treads for traction
- Interlocking sections create a 5' long workstation mat or runners in 30" increments.
- Beveled borders for safety

### Applications:

**Designed for easy installation of anti-static (ESD) floors in diverse spaces. This floor can be disassembled and moved to a different space or location.**

#### Specifications:

Size	28-inch W x 30-inch L
Thickness	1/2"
Weight	14lbs
Color	Black
Surface	Diamond-Plate Emboss
Point to Point Resistance	10 <sup>3</sup> - 10 <sup>5</sup>

#### Part Numbers:

FM9C:	Diamond Anti-fatigue mat, Interlocking Center, 28"x 30"
FM9E:	Diamond Anti-fatigue mat, Interlocking End, 28"x 30"
