## Matting

# TRANSFORMING TECHNOLOGIES

**OUTSTANDING ALTERNATIVES IN STATIC CONTROL** 

# **VinylSTAT VMB** Three Layer Vinyl Mat with Foam Back

#### ESD work surface protection with extra cushion.

VinylSTAT B provides excellent ESD protection as well as cushioning for component protection and operator comfort. VinylSTAT B utilizes a three layer construction consisting of a conductive metalized fleece sandwiched between a solid, vinyl top surface and a foam, base layer. Surface resistivity is 10^7 – 10^8.

Resistant to degradation by inorganic acids, organic acids, reducing agents, detergent solutions, alcohols, aliphatic hydrocarbons, mineral oil, amines, and aldehydes.

Meets or exceeds requirements of ANSI/ESD S20.20 per ANSI/ESD STM4.1

### Features

- ESD Mat with Cushioning
- Surface resistance is 10<sup>7</sup> 10<sup>8</sup>.
- Blue or Gray
- Available in rolls or an assortment of lengths.

#### **Applications:**

Creates an ESD safe work area by a providing a path-to-ground for electrical charges as well as protecting the work surface from damage.
