Description

Tripp Lite's B132-100A-SR VGA with Audio over Cat5 Extender Receiver Unit is designed to work with Tripp Lite's B13 and B13 VGA with Audio over Cat5 Extender / Splitter Transmitter Units. Unlike the B13 Receiver Unit (which supports distances up to 1,000-ft.), or the B132-100A-MR (which supports distances up to 750-ft.) the B132-100A-SR is a cost effective solution for distances up to 300-ft. It extends a 1440 x 900 video and audio signal up to 150-ft. from the source, or a 1024 x 768 video and audio signal up to 300-ft. Power is supplied via the included USB Micro-B cable, with no external power supply required. Connect the included Micro-B cable between the Receiver and a USB port on a computer, monitor, or USB wall charger, such as the Tripp Lite UAC. It also features equalization and gain controls to adjust the video image. Audio connections are made with standard 3.5 (not included). Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.
