

## Insulated Gate Bipolar Transistor (Ultrafast Speed IGBT), 100 A

**SOT-227**

| PRIMARY CHARACTERISTICS |                        |
|-------------------------|------------------------|
| $V_{CES}$               | 600 V                  |
| $V_{CE(on)}$ (typical)  | 1.92 V                 |
| $V_{GE}$                | 15 V                   |
| $I_C$                   | 100 A                  |
| Speed                   | 8 kHz to 30 kHz        |
| Package                 | SOT-227                |
| Circuit configuration   | Single switch no diode |

**FEATURES**

- Ultrafast: optimized for minimum saturation voltage and speed up to 30 kHz in hard switching, > 200 kHz in resonant mode
- Very low conduction and switching losses
- Fully isolate package (2500 V<sub>AC</sub>/RMS)
- Very low internal inductance ( $\leq 5$  nH typical)
- Industry standard outline
- UL approved file E78996
- Designed and qualified for industrial level
- Material categorization: for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

**RoHS  
COMPLIANT**
**BENEFITS**

- Designed for increased operating efficiency in power conversion: UPS, SMPS, welding, induction heating
- Lower overall losses available at frequencies = 20 kHz
- Easy to assemble and parallel
- Direct mounting to heatsink
- Lower EMI, requires less snubbing
- Plug-in compatible with other SOT-227 packages

| ABSOLUTE MAXIMUM RATINGS                         |                |  |             |                  |
|--|----------------|--|-------------|------------------|
| PARAMETER  | SYMBOL         | TEST CONDITIONS  | MAX.        | UNITS            |
| Collector to emitter breakdown voltage           | $V_{CES}$      |  | 600         | V                |
| Continuous collector current                     | $I_C$          | $T_C = 25\text{ }^\circ\text{C}$   | 200         | A                |
|  |                | $T_C = 100\text{ }^\circ\text{C}$  | 100         |                  |
| Pulsed collector current                         | $I_{CM}$       |  | 400         |                  |
| Clamped inductive load current                   | $I_{LM}$       | $V_{CC} = 80\% (V_{CES}), V_{GE} = 20\text{ V}, L = 10\text{ }\mu\text{H}, R_g = 2.0\text{ }\Omega$ , see fig. 13a | 400         |                  |
| Gate to emitter voltage                          | $V_{GE}$       |  | $\pm 20$    | V                |
| Reverse voltage avalanche energy                 | $E_{ARV}$      | Repetitive rating; pulse width limited by maximum junction temperature   | 160         | mJ               |
| RMS isolation voltage                            | $V_{ISOL}$     | Any terminal to case, $t = 1\text{ min}$   | 2500        | V                |
| Maximum power dissipation                        | $P_D$          | $T_C = 25\text{ }^\circ\text{C}$   | 500         | W                |
|  |                | $T_C = 100\text{ }^\circ\text{C}$  | 200         |                  |
| Operating junction and storage temperature range | $T_J, T_{Stg}$ |  | -55 to +150 | $^\circ\text{C}$ |
| Mounting torque                                  |                | 6-32 or M3 screw   | 1.3 (12)    | Nm (lbf.in)      |
