### DESCRIPTION

The VOR2142 is a 400 V dual channel normally open optically isolated solid-state relay (SPST - 1 form A). Based on hybrid architecture which allows fast switching times with a wide operating ambient temperature range. A high efficient GaAlAs IRED enables low forward current on the input side. On the output side high performance MOSFET switches provide a low R<sub>ON</sub> and can switch both DC and AC signals.

### APPLICATIONS

- General telecom switching
- Metering
- Security equipment
- Instrumentation
- Industrial controls
- Battery management systems
- Automatic test equipment

### AGENCY APPROVALS

- UL1577, file no. E52744
- DIN EN 60747-5-5 (VDE 0884-5)
